

CHECK OUT REQUIREMENTS

In order to rent an aircraft in Aerowood's fleet, you must be a certificated pilot. Obtaining a check out is based on a gauge of the pilot's abilities, and is up to instructor discretion — we do not require a set number of hours for a check out; however, some of our aircraft do require a minimum number of hours in type or time (such as Complex time). Listed below are the minimum requirements to get checked out in each of our aircraft and fly it without an instructor.
